One-Stop Professional EPP Products Manufacturer

青島思銘瑞精密科技有限公司

ENTERPRISE INTRODUCTION

企业简介

Qingdao Simingrui Precise Technology Co., Ltd.

Qingdao Simingrui Precise Technology Co., Ltd. is a modern packaging products enterprise integrating foam-product production, mold design and machinery manufacture. We have two production bases located in Qingdao and Zouping in Shandong province, covering exceed 50,000 square meters and is one of the largest professional manufacturing factories in China at present.

We focus on R&D and manufacture EPP products, has one professional precision mold manufacturing subsidiary which can quickly support one-stop solution from design, mold to sample.

We own 12 production lines of EPP, and all had installed same newest equipment with leading manufacturers in whole world. Every month can finish more than 200 tons EPP/EPE/ETPU products, and ensure to meet quality and production capacity as customers requested.

Factory equipment

Our company has advanced equipment and strong technical force. At present, we have more than 30 mold processing equipment, such as CNC machining center and gantry milling etc., 10 professional mold design engineers, and more than 50 mold professional technicians.

Finished product warehouse

The company has established cooperative relationships with 50 countries and has long-term partnerships with 500 clients, demonstrating strong market competitiveness.

PRODUCT APPLICATION AREAS

产品应用领域

Cold chain packaging

The application of EPP insulated boxes in SF cold chain is very extensive, including the transportation of fresh food, pharmaceuticals, flowers and plants, precision instruments, etc. The environmental friendliness, non toxicity, lightweight, high strength, good durability, and excellent insulation performance of EPP materials make it an ideal choice in cold chain logistics. With the continuous progress of the logistics industry, EPP insulated boxes bring more convenience and value to society.

Toy for children

EPP children's toys combine safety, environmental friendliness, fun, and educational value, making them an ideal material for children's toys. They provide a safe and fun play experience for children, while promoting their intellectual and physical development.

Ventilation system

The EPP fresh air system provides users with an efficient, quiet, environmentally friendly, and energy-saving indoor air solution through its unique material properties, airflow distribution, noise control, easy installation, durability, environmental friendliness, and energy-saving noise reduction advantages.

Leisure sports

The advantages of EPP leisure sports products are not only reflected in their lightweight, high-strength, environmentally friendly and recyclable characteristics, but also in their excellent cushioning performance and good stability, which together ensure the wide application and superiority of EPP products in the field of leisure sports.

Automobile field

The widespread application of EPP in the automotive industry not only reflects its excellent performance, but also brings comprehensive improvements to the lightweighting, safety, comfort, environmental protection, and durability of automobiles.

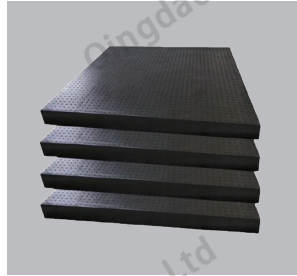

Cushion packaging

EPP electronic packaging occupies an important position in the field of electronic product packaging due to its excellent cushioning performance, lightweight design, environmental sustainability, good insulation performance, strong customizability, and chemical corrosion resistance.

OTHER APPLICATION AREAS

其他应用领域

EPP foam board

EPP surfboard

EPP helmet

EPP Pallet

Optional color

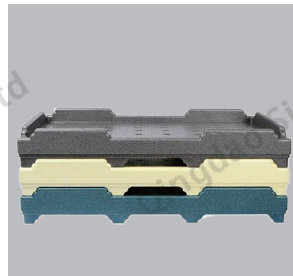

EPP beehives

EPP pet toys

EPP Yoga block

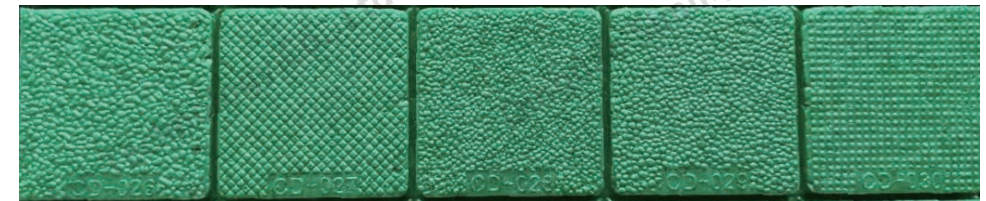

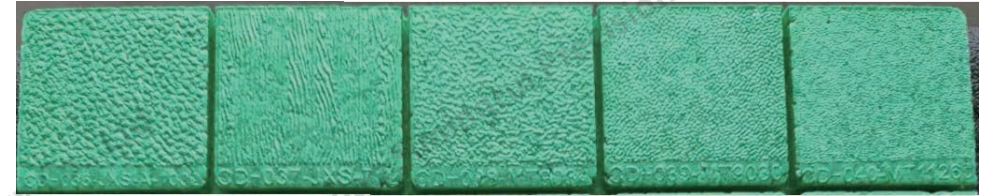

EPP Children's Nap Bed

TEXTURE OPTIONS/ CUSTOMIZATION

纹理选择或定制

Texture Options/ Customization

The tools we have developed allow us to increase the quality and clarity of the texture, while applying it in a more environmentally friendly process than before. Grain effect patterns are created with precision down to the smallest detail, giving manufactured parts made from EPP a very fine, luxurious look.

Upon request, we can apply any texture to the parts. we can precisely superimpose a texture visualization onto an already existing component. The customer can more easily make a choice of the optimal solution.

PRODUCT CUSTOMIZATION PROCESS

产品定制流程

SimingRui strives for the satisfaction of every customer, and welcomes customers from all over the world to contact us.

01 Understand customization requirements

02 Product design

03 CNC Prototype

04 Product mold opening

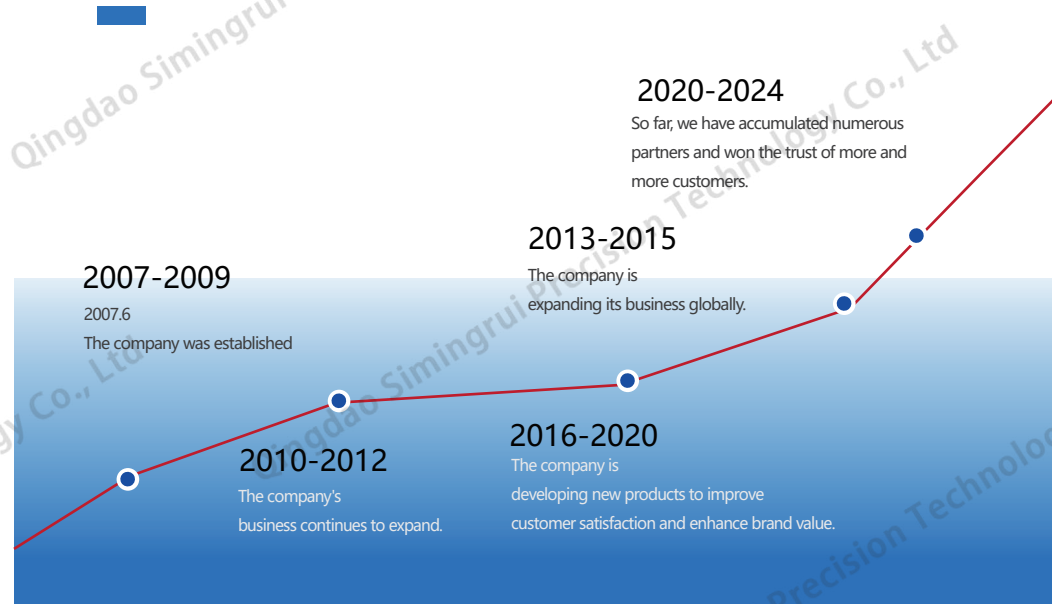

05 Production quality inspection

06 Logistics and distribution
